

The 1.5°C Supply Chain Leaders commitment to act;

1. We have all committed to reducing our greenhouse gas emissions across our value chain in line with the 1.5°C ambition. We integrate climate in our business strategy and drive climate action as part of our wider role in society (as members of the [Exponential Roadmap Initiative](#) and/or [Business Ambition for 1.5°C](#)).

2. We will work together with our suppliers and business partners to join us on this journey by taking action aiming to halve greenhouse gas emissions before 2030, reaching net-zero before 2050 and communicate progress annually, e.g. as outlined in the SME Climate Commitment. To promote, reward and inspire action, we plan to make climate related targets and performance a key supplier purchasing criteria within one year.

3. We recognize the challenge this poses for our suppliers and we will support them, working together to reach our shared goals. In addition, we will support SMEs globally through the SME Climate Hub with tools, knowledge and best practice for implementing a robust climate strategy, to support broad action.

Only by working together will we reduce our greenhouse gas emissions. Ambitious targets supported by firm action and collaboration will inspire others to do the same.

Join us now in the Race to Zero.
