23 November 2020

Dear xxx,

As the world looks to rebuild from the Covid-19 pandemic, we have a unique opportunity to change the way the economy works - creating a fairer, more resilient, low carbon society.

BT has led on climate action for over 28 years and in June we pledged our support for a green recovery – announcing two new initiatives:

- The UK Electric Fleets Coalition - together with The Climate Group, we’re calling on the UK Government to target 100% electric car and van sales by 2030; extend grants for electric vehicles and charging points through to at least 2023 and speed up the rollout of public charge-points across the country.
- The Green Tech Innovation Platform - the platform aims to uncover the latest green technologies from UK-based tech scale-ups that could support BT and its public sector customers.

We continue to work towards meeting our target to be a net zero carbon emissions business by 2045. This means we are looking to reduce the carbon emissions intensity of our operations by 87% by 2030 on 2016/17 levels and to reduce the carbon emissions associated with our supply chain by 42% by 2030.

**That’s where we need your help:**

To achieve our ambitions, we can’t do this alone, and that is why I’m reaching out to you today to seek your support. Considerations to think about include:

- Have you set a 1.5°C aligned/net zero science based target?
- Do you purchase 100% renewable electricity?
- Do you engage with your suppliers on climate and environmental issues?

Have you given thought to your plans in the above areas and how these can be achieved?

**We offer a couple of tools which we hope can help you and your suppliers set net zero targets:**

- The 1.5°C Business Playbook – a spin-off from the Exponential Roadmap. It is supported by an eco-system of more than 50 front runners in the 1.5°C ambition, including the International Chamber of Commerce (ICC), WWF, BT, Ericsson, IKEA, Telia and Unilever. The Playbook provides a guide for
companies in setting strategies and taking action to reduce their emissions. Here’s the Playbook.

- BT has also recently joined the 1.5 °C Supply Chain Leaders initiative. This is a coalition that has announced the launch of the SME Climate Hub – co-hosted by the International Chamber of Commerce (ICC), the Exponential Roadmap Initiative, the We Mean Business coalition and the United Nations Race to Zero campaign.

- The SME Climate Hub will provide resources around best practice and tools on how to set these ambitious emissions targets and develop strategies to meet them. Here’s some additional information.

- Other useful information includes:
  - CDP
  - RE100
  - The Science Based Targets Initiative

It is critical to mobilise the entire business sector for the 1.5°C ambition and we hope to have your support.

Please take a few moments to fill out our short survey which can he found here: xxxxx
