

Join the UN Race to Zero & the Exponential Roadmap Initiative

The **Exponential Roadmap Initiative** brings together innovators, scientists, companies and NGOs which are taking action in line with the 1.5°C ambition, with the mission to halve emissions before 2030 through exponential climate action and solutions. It is one of the accredited initiatives for businesses to join the United Nations' [Race to Zero](#) campaign.

The **Exponential Roadmap Initiative** brings together transformative and disruptive businesses, committed to halving emissions before 2030 towards net zero emissions by 2050 at the latest, integrating climate in business strategy and influencing climate action in society, as described by the 4 pillar framework in the [1.5°C Business Playbook](#). The initiative is also directed towards rapidly growing companies providing climate solutions, who want to join the UN Race to Zero.

The **Exponential Commitment** is the baseline requirement to join the Exponential Roadmap Initiative. Businesses will gain recognition from the Exponential Roadmap Initiative and the United Nations' Race to Zero campaign on the [dedicated website](#) once approved.

Exponential Commitment

In recognising the climate emergency, our company commits to take action immediately in order to:

- Halve our own and value chain greenhouse gas emissions before 2030
- Achieve net zero emissions before 2050
- Integrate climate in business strategy
- Influence climate action in society
- Disclose our progress publically on an annual basis

Thereby contributing to halving global emissions before 2030 through exponential climate action and solutions.

Small and medium sized businesses (up to 500 employees) can join the United Nations' Race to Zero through the [SME Climate Hub](#), gaining access to tools to take climate action.

If you are interested in joining the UN Race to Zero and the Exponential Roadmap Initiative, send us an inquiry to partnerships@exponentialroadmap.org
